

Accelerating business evolution

Business Management Software for Small to Medium Manufacturers

Caliach Vision – the foundation of success

The system operates under Microsoft Windows, Apple Macintosh and Linux operating systems, and can be deployed multi-platform in a mixed local area network environment. Wide area network support is available through thin client technologies such as Microsoft Terminal Services and Citrix.

A critical success factor in the implementation and operation of any enabling technology is ease of use. Caliach Vision has been designed to simplify and speed processing with an ergonomic and intuitive Graphical User Interface (GUI). Users can be empowered with a customised working environment, including a structured function navigator complete with personalised help.

Reflecting modern working practices, multiple tasks and windows can be active simultaneously and interactively, while extensive drag-and-drop and drill-down capabilities further increase efficiency. Staff costs are further reduced with comprehensive pop-up help and an integrated, searchable reference system.

Caliach Ltd is an acknowledged expert and innovator in manufacturing management systems. Our aim is to exploit the latest technology to deliver simple, powerful, affordable business management software.

Established in 1990, Caliach Ltd pioneered enterprise resource planning software for small to medium-sized manufacturers, driving the industry standard for the sector. Multinational manufacturing experience led to steady growth in our user base, and our systems have proven themselves in a wide range of industries.

We are committed to providing the highest quality products, backed by responsive customer service and support. Our objective is to establish Caliach Vision and future products as standard management tools for small to medium-sized businesses, just as office and accounting programs are today. With Caliach Vision, manufacturing excellence is no longer the exclusive preserve of large corporations.
